

MUSC – Multi User Space Conquest

We actually bring people to space

René Weller & Gabriel Zachmann

University of Bremen, Germany

cgvr.informatik.uni-bremen.de

Abstract

- Create a multi-user VR platform that enables a team of distributed space researchers to discuss and plan future space missions collaboratively
- Basis is an Unreal-Engine-5-based virtual testbed for a planned mission to the planet Mars
 - Including models of vehicles and realistic Mars terrain
- The project is related to an actual scientific research project funded by the German Space Agency (DLR) to plan a mission to investigate the Valles Marineris on planet Mars with a swarm of autonomous robots

Motivation: Mars 2050

Background: Metaverse

Main Goal of the Project

- Create a highly immersive VaMEx-VTB Experience
 - Virtual Reality
 - Multi User
 - Interactive
- Stable, performant over large distances (via Internet)

Project Tasks

■ Programming:

- Multi User VR-Implementation in Unreal 5
- Multi User VR navigation
- Interactions with environment
 - Throwing rocks
 - Gravity gun

■ Modelling:

- Avatar modelling (MetaHuman)
- Avatar animation
 - Full body mocap suit
 - Facial animation (?)
- Terrain modelling and texturing
 - Based on actual Mars scans by the NASA

Project Infos

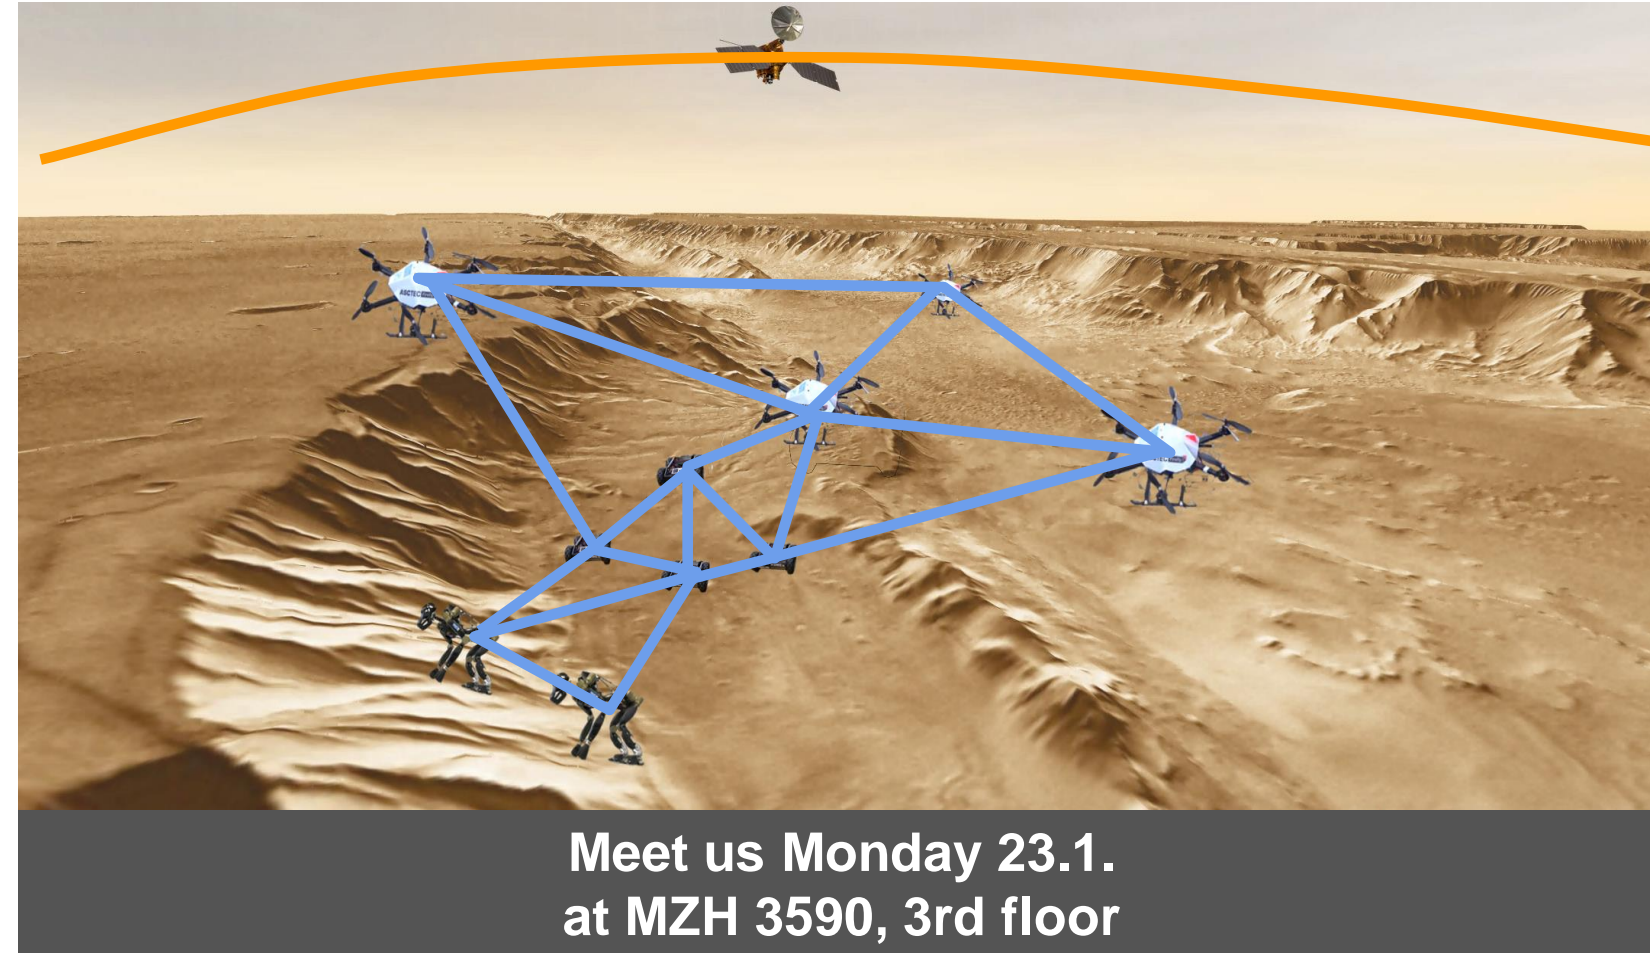

- This project is right for you, if
 - You study **computer science**, you know C++ and want to gain serious practice in computer graphics and VR programming
 - You study **digital media** and you are a creative mind with skills in 3D design & modelling (and/or 2D)
- If you like research & development in a space context
- Like to work with an interdisciplinary research team

Project Infos

- **One-semester** project (with regular work in our lab)
- **Summer semester 2023**
- Prerequisites:
 - A bit of computer graphics / 3D knowledge
 - E.g., from “Computer graphics” or “Virtual Reality” course
 - A bit of programming skills in C/C++ and/or modelling skills
- The envisioned project team: mix of CS & DM students
- Further info (Schnuppertermin):
 - Place: MZH 3590, 3rd floor, CGVR lab
 - Time: January 23 (Monday), 16:00
- Great opportunities for bachelor theses subsequently
- Language: German (except other requirements appear)

Ready to conquer new worlds with us?
